

Zoom in or out

If you want to zoom while reading a diagram, you can do one of the following:

To zoom in or out with buttons,	<div>click Zoom in () or Zoom out () respectively.</div>
To zoom in or out by scaling,	<div><div><div>1. Click the Overview button (). An overview inset is displayed over the diagram. You can still see the diagram underneath it.</div><div>2. Move your mouse pointer over the lower right corner of the blue square, until it turns into a sleek slanted arrow.</div></div><div><p>The diagram shows a complex hierarchical tree structure. A large light blue rectangle (the overview inset) is positioned over the top portion of the tree. At the bottom right corner of this blue rectangle, a mouse cursor has changed into a black arrow pointing diagonally down and to the left. This corner is highlighted by a red square. Below the diagram, two colored boxes are visible: a yellow one labeled 'Basel Calculator' and a green one labeled 'Exposure Default'.</p></div><div>3. Click and hold, then drag the pointer to zoom in or out.</div></div>
To zoom in or out by scrolling with your mouse,	<div>move your mouse pointer to anywhere on the diagram and use your mouse wheel to zoom. The zoom is centered at the mouse pointer.</div>
