

# Displaying a traceability diagram

You can perform the following actions when displaying a diagram:

- Change the [view](#) and [layout](#)
- [Manage diagram views](#): create, modify, copy or delete views
- Select a node and dim all the nodes that are not directly related to it
- Display the diagram on a full screen
- Display a preview in the traceability diagram: display a preview of a selected asset
- Display or hide the labels of the edges
- Explore a node's relations
- Export the diagram to PDF
- Jump to a related asset's diagram
- Move nodes
- Undo the display changes
- Use an overview inset
- Zoom in or out
