

# Example diagram view: Groups Hierarchy

One of the packaged diagram views is the **Groups Hierarchy** view.

Below is a visual representation of the view.

The view is a loop and flows from Business Asset to Business Asset.

The view applies to any Business Asset, including any child asset type: Business Term, Acronym, KPI, Report, etc.

Below is the JSON code of the view.

```
{
  "nodes": [
    {
      "id": "Business Asset",
      "conceptTypeId": "00000000-0000-0000-0000-0000000031101"
    }
  ],
  "edges": [
    {
      "from": "Business Asset",
      "to": "Business Asset",
      "binaryFactTypeId": "00000000-0000-0000-0000-000000007021",
      "roleDirection": true
    }
  ]
}
```
