# Jump to a related asset's diagram

If you are viewing a diagram for a given asset, you can apply the same diagram view to an asset in the diagram with a single click.

1. Open an asset page.
2. Click **Traceability > Diagram**.
   Wait for the diagram to render.
3. Move your mouse pointer over a node.

   The ⬆ button appears in the upper left corner of the node.

4. Click the ⬆ button.
   The diagram changes and becomes the diagram for the new node. DGC applies the same diagram view to this node.
   Note: Only the diagram has changed, the rest of the asset page still refers to the asset you started from.

   ⊘ To return to the original diagram, click the ⟲ button.
