Change view and layout of a diagram

If the current view or layout does not meet your needs, you can change them by taking the following steps:

1. Open an asset page.
2. Click **Traceability > Diagram**.
   Wait for the diagram to render.
3. Do one or more of the following:

To select an other view,	click the arrow next to the view name and select another view from the list.
To select an other layout,	click the arrow next to the currently selected layout and select a different one. Note: For more information about layouts, check here.
To move a node,	a. Click a node and hold down your mouse button. b. Move the node to where you want in the diagram and release the mouse button. Note that you cannot save the view with these changes. You can, however, export the diagram with these changes.
To go back to the original diagram,	click the **Redraw** button. Note: All your changes are undone.
